# pdf-merger-js TS

5.1.1 • [Public](#) • Published 2 months ago

[Readme](#)[Code](#) Beta[2 Dependencies](#)[65 Dependents](#)[27 Versions](#)

## Description

This node.js library can **merge multiple PDF documents**, or parts of them, to one new PDF document. It's only dependency is **pdf-lib** so it can run in any javascript-only environment **without any non-javascript dependencies**.

## Legacy notes

- If you are searching for the legacy version based on **pdfjs** please install a **v3 release**. Since **v4** we use **pdf-lib** instead.
- If you are searching for a legacy version using CommonJS modules please install a **v4 release**. Since **v5** we use the modern ESM ("import") instead of the CommonJS ("require") module standard.

This library is inspired by the **PHP library PDFMerger** and has a very similar API.

# Installation

---

```
npm install --save pdf-merger-js
```

or global installation if you just want to use the cli tool:

```
npm install -g pdf-merger-js
```

## Usage

---

### CLI "pdf-merge"

Usage: pdf-merge [options] <inputFiles...>

merge multiple PDF documents, or parts of them, to a new PDF document

Options:

-V, --version	output the version number
-o, --output <outputFile>	Merged PDF output file path
-v, --verbose	Print verbose output
-s, --silent	do not print any output to stdout. Overwr
-h, --help	display help for command

### Example calls

---

Merge pages 1-2 from the first input with pages 1,2 and 5-7 from the second pdf document:

```
pdf-merge --output ./merged.pdf ./input1.pdf#1-2 ./input2.pdf#1,2,5-7
```

Get two pdf files from the an url and merge the first one with pages 2-3 from the second one:

```
pdf-merge --verbose --output ./sample.pdf Testfile.pdf
```

```
https://pdfobject.com/pdf/sample.pdf
```

```
https://upload.wikimedia.org/wikipedia/commons/1/13/Example.pdf#2-3
```

### node.js

The node.js version has the following export functions:

- `saveAsBuffer` exports a merged pdf as an **Buffer**.
- `save` saves the pdf under the given filename.
- `setMetadata` set Metadata for producer, author, title or creator.
- `reset` resets the internal state of the document, to start again.

### async node.js example

---

```
import PDFMerger from 'pdf-merger-js';

var merger = new PDFMerger();

(async () => {
  await merger.add('pdf1.pdf'); //merge all pages. parameter is the p
  await merger.add('pdf2.pdf', 2); // merge only page 2
  await merger.add('pdf2.pdf', [1, 3]); // merge the pages 1 and 3
  await merger.add('pdf2.pdf', '4, 7, 8'); // merge the pages 4, 7 and
  await merger.add('pdf3.pdf', '3 to 5'); //merge pages 3 to 5 (3,4,5)
  await merger.add('pdf3.pdf', '3-5'); //merge pages 3 to 5 (3,4,5)

  // Set metadata
  await merger.setMetadata({
    producer: "pdf-merger-js based script",
    author: "John Doe",
    creator: "John Doe",
    title: "My live as John Doe"
  });

  await merger.save('merged.pdf'); //save under given name and reset t

  // Export the merged PDF as a nodejs Buffer
  // const mergedPdfBuffer = await merger.saveAsBuffer();
```

```
// fs.writeFileSync('merged.pdf', mergedPdfBuffer);
})();
```

## Browser

The Browser version has the following export functions:

- `saveAsBuffer` exports a merged pdf as an `Uint8Array`.
- `saveAsBlob` exports a merged pdf as a `Blob`.
- `save` starts a file-download directly in the browser.
- `setMetadata` set Metadata for producer, author, title or creator.
- `reset` resets the internal state of the document, to start again.

### async react example

---

```
import PDFMerger from 'pdf-merger-js/browser';
import React, { useEffect, useState } from 'react';

// files: Array of PDF File or Blob objects
const Merger = (files) => {
  const [mergedPdfUrl, setMergedPdfUrl] = useState();

  useEffect(() => {
    const render = async () => {
      const merger = new PDFMerger();

      for(const file of files) {
        await merger.add(file);
      }

      await merger.setMetadata({
        producer: "pdf-merger-js based script"
      });

      const mergedPdf = await merger.saveAsBlob();
```

```
    const url = URL.createObjectURL(mergedPdf);

    return setMergedPdfUrl(url);
  };

  render().catch((err) => {
    throw err;
  });

  () => setMergedPdfUrl({});
}, [files, setMergedPdfUrl]);

return !data ? (
  <>Loading</>
) : (
  <iframe
    height={1000}
    src={` ${mergedPdfUrl}`}
    title='pdf-viewer'
    width='100%'
  ></iframe>
);
};
```

## Similar libraries

---

- [pdf-merge](#) has a dependency on [PDFtk](#).
- [easy-pdf-merge](#) has a dependency on the [Apache PDFBox® - A Java PDF Library](#).
- [pdfmerge](#) has a dependency on python and [PyPDF2](#).

## Keywords

---

pdf merge

Install

```
> npm i pdf-merger-js
```

# pdf-merger-js TS

5.1.1 • [Public](#) • Published 2 months ago

[Readme](#)[Code](#) Beta[2 Dependencies](#)[65 Dependents](#)[27 Versions](#)

## Description

This node.js library can **merge multiple PDF documents**, or parts of them, to one new PDF document. It's only dependency is **pdf-lib** so it can run in any javascript-only environment **without any non-javascript dependencies**.

## Legacy notes

- If you are searching for the legacy version based on **pdfjs** please install a **v3 release**. Since **v4** we use **pdf-lib** instead.
- If you are searching for a legacy version using CommonJS modules please install a **v4 release**. Since **v5** we use the modern ESM ("import") instead of the CommonJS ("require") module standard.

This library is inspired by the **PHP library PDFMerger** and has a very similar API.

# Installation

---

```
npm install --save pdf-merger-js
```

or global installation if you just want to use the cli tool:

```
npm install -g pdf-merger-js
```

## Usage

---

### CLI "pdf-merge"

Usage: pdf-merge [options] <inputFiles...>

merge multiple PDF documents, or parts of them, to a new PDF document

Options:

-V, --version	output the version number
-o, --output <outputFile>	Merged PDF output file path
-v, --verbose	Print verbose output
-s, --silent	do not print any output to stdout. Overwr
-h, --help	display help for command

### Example calls

---

Merge pages 1-2 from the first input with pages 1,2 and 5-7 from the second pdf document:

```
pdf-merge --output ./merged.pdf ./input1.pdf#1-2 ./input2.pdf#1,2,5-7
```

Get two pdf files from the an url and merge the first one with pages 2-3 from the second one:

```
pdf-merge --verbose --output ./sample.pdf Testfile.pdf
```

```
https://pdfobject.com/pdf/sample.pdf
```

```
https://upload.wikimedia.org/wikipedia/commons/1/13/Example.pdf#2-3
```

### node.js

The node.js version has the following export functions:

- `saveAsBuffer` exports a merged pdf as an **Buffer**.
- `save` saves the pdf under the given filename.
- `setMetadata` set Metadata for producer, author, title or creator.
- `reset` resets the internal state of the document, to start again.

### async node.js example

---

```
import PDFMerger from 'pdf-merger-js';

var merger = new PDFMerger();

(async () => {
  await merger.add('pdf1.pdf'); //merge all pages. parameter is the p
  await merger.add('pdf2.pdf', 2); // merge only page 2
  await merger.add('pdf2.pdf', [1, 3]); // merge the pages 1 and 3
  await merger.add('pdf2.pdf', '4, 7, 8'); // merge the pages 4, 7 and
  await merger.add('pdf3.pdf', '3 to 5'); //merge pages 3 to 5 (3,4,5)
  await merger.add('pdf3.pdf', '3-5'); //merge pages 3 to 5 (3,4,5)

  // Set metadata
  await merger.setMetadata({
    producer: "pdf-merger-js based script",
    author: "John Doe",
    creator: "John Doe",
    title: "My live as John Doe"
  });

  await merger.save('merged.pdf'); //save under given name and reset t

  // Export the merged PDF as a nodejs Buffer
  // const mergedPdfBuffer = await merger.saveAsBuffer();
```

```
// fs.writeFileSync('merged.pdf', mergedPdfBuffer);
})();
```

## Browser

The Browser version has the following export functions:

- `saveAsBuffer` exports a merged pdf as an `Uint8Array`.
- `saveAsBlob` exports a merged pdf as a `Blob`.
- `save` starts a file-download directly in the browser.
- `setMetadata` set Metadata for producer, author, title or creator.
- `reset` resets the internal state of the document, to start again.

### async react example

---

```
import PDFMerger from 'pdf-merger-js/browser';
import React, { useEffect, useState } from 'react';

// files: Array of PDF File or Blob objects
const Merger = (files) => {
  const [mergedPdfUrl, setMergedPdfUrl] = useState();

  useEffect(() => {
    const render = async () => {
      const merger = new PDFMerger();

      for(const file of files) {
        await merger.add(file);
      }

      await merger.setMetadata({
        producer: "pdf-merger-js based script"
      });

      const mergedPdf = await merger.saveAsBlob();
```

```
    const url = URL.createObjectURL(mergedPdf);

    return setMergedPdfUrl(url);
  };

  render().catch((err) => {
    throw err;
  });

  () => setMergedPdfUrl({});
}, [files, setMergedPdfUrl]);

return !data ? (
  <>Loading</>
) : (
  <iframe
    height={1000}
    src={` ${mergedPdfUrl}`}
    title='pdf-viewer'
    width='100%'
  ></iframe>
);
};
```

## Similar libraries

# pdf-merger-js TS

5.1.1 • [Public](#) • Published 2 months ago

[Readme](#)[Code](#) Beta[2 Dependencies](#)[65 Dependents](#)[27 Versions](#)

## Description

This node.js library can **merge multiple PDF documents**, or parts of them, to one new PDF document. It's only dependency is **pdf-lib** so it can run in any javascript-only environment **without any non-javascript dependencies**.

## Legacy notes

- If you are searching for the legacy version based on **pdfjs** please install a **v3 release**. Since **v4** we use **pdf-lib** instead.
- If you are searching for a legacy version using CommonJS modules please install a **v4 release**. Since **v5** we use the modern ESM ("import") instead of the CommonJS ("require") module standard.

This library is inspired by the **PHP library PDFMerger** and has a very similar API.

# Installation

---

```
npm install --save pdf-merger-js
```

or global installation if you just want to use the cli tool:

```
npm install -g pdf-merger-js
```

## Usage

---

### CLI "pdf-merge"

Usage: pdf-merge [options] <inputFiles...>

merge multiple PDF documents, or parts of them, to a new PDF document

Options:

-V, --version	output the version number
-o, --output <outputFile>	Merged PDF output file path
-v, --verbose	Print verbose output
-s, --silent	do not print any output to stdout. Overwr
-h, --help	display help for command

### Example calls

---

Merge pages 1-2 from the first input with pages 1,2 and 5-7 from the second pdf document:

```
pdf-merge --output ./merged.pdf ./input1.pdf#1-2 ./input2.pdf#1,2,5-7
```

Get two pdf files from the an url and merge the first one with pages 2-3 from the second one:

```
pdf-merge --verbose --output ./sample.pdf Testfile.pdf
```

```
https://pdfobject.com/pdf/sample.pdf
```

```
https://upload.wikimedia.org/wikipedia/commons/1/13/Example.pdf#2-3
```

### node.js

The node.js version has the following export functions:

- `saveAsBuffer` exports a merged pdf as an **Buffer**.
- `save` saves the pdf under the given filename.
- `setMetadata` set Metadata for producer, author, title or creator.
- `reset` resets the internal state of the document, to start again.

### async node.js example

---

```
import PDFMerger from 'pdf-merger-js';

var merger = new PDFMerger();

(async () => {
  await merger.add('pdf1.pdf'); //merge all pages. parameter is the p
  await merger.add('pdf2.pdf', 2); // merge only page 2
  await merger.add('pdf2.pdf', [1, 3]); // merge the pages 1 and 3
  await merger.add('pdf2.pdf', '4, 7, 8'); // merge the pages 4, 7 and
  await merger.add('pdf3.pdf', '3 to 5'); //merge pages 3 to 5 (3,4,5)
  await merger.add('pdf3.pdf', '3-5'); //merge pages 3 to 5 (3,4,5)

  // Set metadata
  await merger.setMetadata({
    producer: "pdf-merger-js based script",
    author: "John Doe",
    creator: "John Doe",
    title: "My live as John Doe"
  });

  await merger.save('merged.pdf'); //save under given name and reset t

  // Export the merged PDF as a nodejs Buffer
  // const mergedPdfBuffer = await merger.saveAsBuffer();
```

```
// fs.writeFileSync('merged.pdf', mergedPdfBuffer);
})();
```

## Browser

The Browser version has the following export functions:

- `saveAsBuffer` exports a merged pdf as an `Uint8Array`.
- `saveAsBlob` exports a merged pdf as a `Blob`.
- `save` starts a file-download directly in the browser.
- `setMetadata` set Metadata for producer, author, title or creator.
- `reset` resets the internal state of the document, to start again.

### async react example

---

```
import PDFMerger from 'pdf-merger-js/browser';
import React, { useEffect, useState } from 'react';

// files: Array of PDF File or Blob objects
const Merger = (files) => {
